# List of Contents

## NUMBER 1

**A. Bacławski, A. Golly, I Książek and T. Wujec** 1 Stark effect in some lines of neutral bromine

**D.W. Mueller Jr and A.L. Crosbie** 19 Three-dimensional radiative transfer in an isotropically scattering, semi-infinite medium: generalized reflection function

**L. Daumont, C. Claveau, M.-R. Debacker-Barilly, A. Hamdouni, L. Régalia-Jarlot, J.-L. Teffo, S. Tashkun and V.I. Perevalov** 37 Line intensities of $^{14}N_2\,^{16}O$: the 10 micrometers region revisited

**T. Götz** 57 Coupling heat conduction and radiative transfer

**C.E. Siewert** 75 Generalized boundary conditions for the S-model kinetic equations basic to flow in a plane channel

*Note*

**F. Erdoğan and C. Tezcan** 89 Radiation transfer in inhomogeneous media

## NUMBER 2

**V. Morozhenko, T. Kostiuk, D. Buhl, T. Hewagama, T.A. Livengood, A. Kollyukh and W.E. Blass** 101 Infrared heterodyne spectroscopic measurements of transition frequencies and intensities of ethylene and isotopic ethylene ($^{13}C_{12}CH_4$) (between 840 and 980 $cm^{-1}$

**J.-M. Hartmann, C. Boulet, C. Brodbeck, N. van Thanh, T. Fouchet and P. Drossart** 117 A far wing lineshape for $H_2$ broadened $CH_4$ infrared transitions

**V.P. Tishkovets** 123 Multiple scattering of light by a layer of discrete random medium: backscattering

**V. Malathy Devi, D. Chris Benner, L.R. Brown, M.A.H. Smith, C.P. Rinsland, R.L. Sams and S.W. Sharpe** 139 Multispectrum analysis of self- and $N_2$-broadening, shifting and line mixing coefficients in the $\nu_6$ band of $^{12}CH_3D$

PII: S0278-4343(01)00231-X

*Note*

V. Morozhenko, T. Kostiuk, W.E. Blass, T. Hewagama and T.A. Livengood — 193 Self- and nitrogen broadening of the $v_{10}20_{11,10} \leftarrow 19_{10,9}$ ethylene transition at 927.01879 $cm^{-1}$

199 Erratum

**NUMBER 3**

A. Benedetti, P. Gabriel and G.L. Stephens — 201 Properties of reflected sunlight derived from a Green's function method

C.E. Sioris and W.F.J. Evans — 227 Modelling higher order radiation fields using iterated integrals of phase functions

H.K. Roscoe and J.G.T. Hill — 237 Vertical resolution of oversampled limb-sounding measurements from satellites and aircraft

G.P. Stiller, T. von Clarmann, B. Funke, N. Glatthor, F. Hase, M. Höpfner and A. Linden — 249 Sensitivity of trace gas abundances retrievals from infrared limb emission spectra to simplifying approximations in radiative transfer modelling

G.M. Petrov — 281 A simple algorithm for spectral line deconvolution

*Note*

M.A. Abdou, A. Elhanbaly, A. Elgarayhi and N.K. Radwan — 289 Solution of Spencer–Lewis equation in an infinite medium plane and spherical geometries

**NUMBER 4**

C.E. Siewert — 299 Inverse solutions to radiative-transfer problems with partially transparent boundaries and diffuse reflection

N.N. Filippov, V.P. Ogibalov and M.V. Tonkov — 315 Line mixing effect on the pure $CO_2$ absorption in the 15 μm region

J. Landgraf, O.P. Hasekamp and T. Trautmann — 327 Linearization of radiative transfer with respect to surface properties

A.A.M. Habib and Z. El-Gohary — 341 The resonance escape factor for Voigt and Lorentz line profiles in atomic absorption measurements

C.-j. Tseng and K.-t. Kuo — 349 Thermal radiative properties of phenolic foam insulation

H.-C. Zhou, S.-D. Han, F. Sheng and C.-G. Zheng — 361 Visualization of three-dimensional temperature distributions in a large-scale furnace via regularized reconstruction from radiative energy images: numerical studies

A. Belafhal, M. Ibnchaikh and K. Nassim — 385 Scattering amplitude of absorbing and nonabsorbing spheroidal particles in the WKB approximation

A. Borovoi, I. Grishin, E. Naats and U. Oppel — 403 Light backscattering by hexagonal ice crystals

W.M. Rysakov and M. Ston' — 419 Light scattering by soft parallelepipeds of arbitrary size

M. Razzaghi, S. Oppenheimer and F. Ahmad 439 Tau method approximation for radiative transfer problems in a slab medium

A.R. Degheidy, M.H. Haggag and A. El-Depsy 449 Albedo problem for finite plane-parallel medium

H. Ishimoto and K. Masuda 467 A Monte Carlo approach for the calculation of polarized light: application to an incident narrow beam

L.H. Coutinho and A.G. Trigueiros 485 Weighted oscillator strengths and lifetimes for the Si XII and Si XIII spectra

J.B. Qi, C.Y. Chen, Y.S. Wang and X.J. Xu 495 A fast calculation of excitation autoionization cross-sections of Na-like ions

S. Chauveau, M.-Y. Perrin, Ph. Rivière and A. Soufiani 503 Contributions of diatomic molecular electronic systems to heated air radiation

C.E. Siewert and D. Valougeorgis 531 An analytical discrete-ordinates solution of the S-model kinetic equations for flow in a cylindrical tube

## NUMBER 5

E.S. Chalhoub and H.F. Campos Velho 551 Estimation of the optical properties of seawater from measurements of exit radiance

M. Ertugrul 567 Measurement of L subshell production cross-section and Coster–Kronig transition probability ($f_{12}$) for Hg and Au elements at the 59.5 keV

J.G. Rubiano, R. Rodríguez, J.M. Gil, F.H. Ruano, P. Martel and E. Mínguez 575 A screened hydrogenic model using analytical potentials

M.A. Atalay 589 Milne problem for linearly anisotropic scattering and a specular and diffuse reflecting boundary

A.Y. Perelman and N.V. Voshchinnikov 607 Improved S-approximation for dielectric particles

A.M. Lubrano, G. Masiello, C. Serio, M. Matricardi and R. Rizzi 623 IMG evidence of chlorofluorocarbon absorption in the atmospheric window region 800–900 $cm^{-1}$

G. Birnbaum, A. Buechele, M.E. Thomas, M. Banta, N. Picqué, G. Guelachvili and J.-M. Hartmann 637 Experimental and theoretical studies of absorption in microwindows of the $\nu_4$-band of methane and methane–hydrogen

J.T.C. Liu, R.K. Hanson and J.B. Jeffries 655 High-sensitivity absorption diagnostic for $NO_2$ using a blue diode laser

A. Prasad Mishra, O. Narayanan, R.J. Kshirsagar, V.P. Bellary and T.K. Balasubramanian 665 Fourier-transform spectroscopic study of the rotational intensity distribution in the first positive $B^3\Pi_g$–$A^3\Sigma_u^+$ band system of the nitrogen molecule

Lj.M. Ignjatović and A.A. Mihajlov 677 The realization of Abel's inversion in the case of discharge with undetermined radius

A.D. Klose, U. Netz, J. Beuthan and A.H. Hielscher 691 Optical tomography using the time-independent equation of radiative transfer — Part 1: forward model

A.D. Klose and A.H. Hielscher 715 Optical tomography using the time-independent equation of radiative transfer —Part 2: inverse model

C. Yelleswarapu and A. Sharma 733 A simple technique for indirect measurement of absorption line widths in Voigt profile regime

*Note*

A. Karabulut, G. Budak, R. Polat, A. Gürol, M. Levent and Y. Şahin 741 EDXRF analysis of murgul pyrite ore concentrates

## NUMBER 6

L.H. Liu, H.P. Tan and T.W. Tong 747 Internal distribution of radiation absorption in a semitransparent spherical particle

Z.Q. Wu, B.A. Zhang, Y.B. Qiu and S.C. Li 757 Estimating the departure from LTE of non-LTE plasmas

V.A. Markel 765 The effects of averaging on the enhancement factor for absorption of light by carbon particles in microdroplets of water

D.W. Steyert, W.F. Wang, J.M. Sirota, N.M. Donahue and D.C. Reuter 775 Pressure broadening coefficients for rotational transitions of water in the 380–600 $cm^{-1}$ range

N. Ekinci, N. Astam and Y. Sahin 783 Qualitative and quantitative analysis of the cataract using EDXRF

Y. Tian and M.A. Box 789 Radiative perturbation theory for polarized radiances: 1. Theory

V.P. Tishkovets, P.V. Litvinov and M.V. Lyubchenko 803 Coherent opposition effects for semi-infinite discrete random medium in the double-scattering approximation

K. Okada, M. Aoyagi and S. Iwata 813 Accurate evaluation of Einstein's $A$ and $B$ coefficients of rovibrational transitions for carbon monoxide: spectral simulation of $\Delta v = 2$ rovibrational transitions in the solar atmosphere observed by a satellite

C.E. Siewert 827 Inverse solutions to radiative-transfer problems based on the binomial or the Henyey–Greenstein scattering law

S.Yu. Reutskiy and B. Tirozzi 837 A new boundary method for electromagnetic scattering from inhomogeneous bodies

S.J. Pestehe and G.J. Tallents 853 Escape factors for laser-plasmas
